

# IMPRINTED CONCRETE SEALER

Long lasting protection for patterned concrete

**Protective and durable coating for imprinted concrete surfaces**

**Smartseal imprinted concrete sealer is a high quality restoration product for patterned imprinted concrete surfaces. Easily applied by sealing broom it can transform the look and appearance of imprinted concrete driveways. If required, colour tints can be added to the sealer to restore the original colour as well as anti-slip additives if the concrete surface is too slippery.**

## PROTECTS AND TRANSFORMS THE LOOK OF IMPRINTED SURFACES

When imprinted concrete is first laid, a colour hardener is screeded into the wet concrete. Once dry, a protective sealer is applied to the surface to protect against surface degradation. Over time, like any external surface exposed to weathering and general wear, the sealer will begin to wear down. If this is left too long before any aspect of maintenance is undertaken, the original colour will start to fade and the surface of the concrete can start to look patchy.

Smartseal imprinted concrete sealer is widely used in both the domestic and commercial sector to provide lasting protection to imprinted concrete surfaces. It is also available as a DIY product for homeowners, who need an easy to apply, long lasting sealer to protect their driveway or patio. To keep an imprinted concrete driveway or patio looking like new, the sealer should be applied to the surface every 3-5 years depending on the amount of wear it receives.

### Benefits of Imprinted Concrete Sealer:

#### UNTREATED

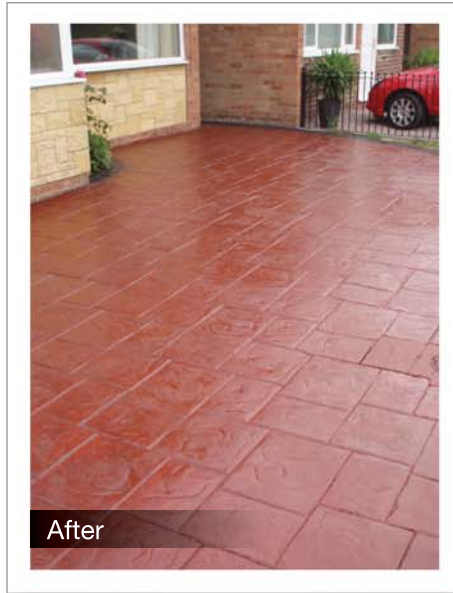

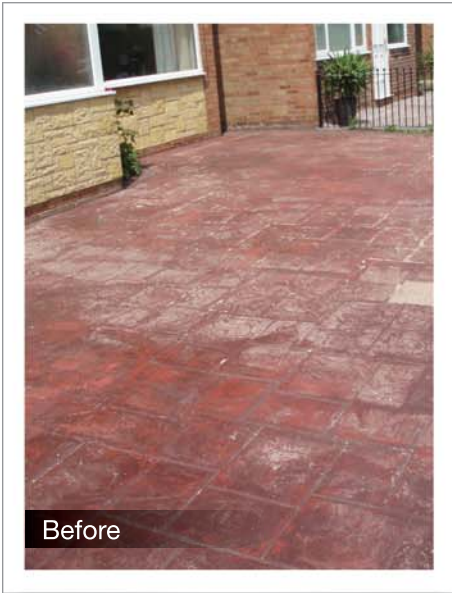

- Loss of colour
- Unsightly stains / algae
- Surface wear
- Deterioration of concrete

#### TREATED

- ✓ Restores original finish
- ✓ Water resistant
- ✓ Helps prevent colour loss
- ✓ Protects against staining
- ✓ Durable finish

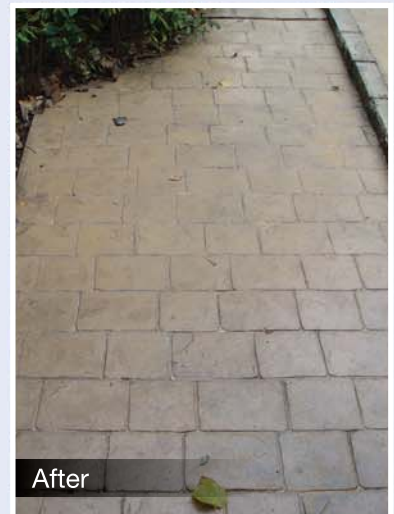

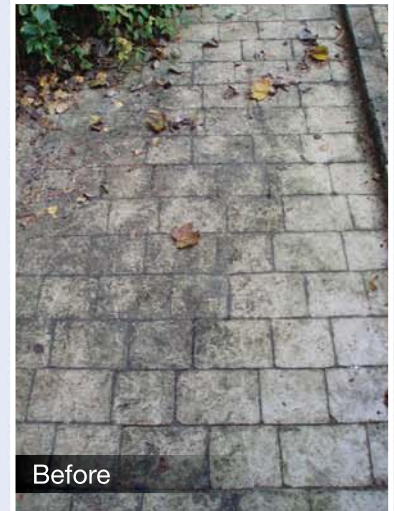

**SmartSeal**  
can transform your  
Imprinted Concrete  
leaving it looking as  
good as new!

## SEE THE DIFFERENCE

After an imprinted concrete surface has been cleaned and sealed

## QUALITY SEALERS FOR PATTERNED CONCRETE SURFACES

Smartseal supply a comprehensive high quality range of imprinted concrete sealers for trade and DIY customers. All sealers for imprinted concrete are manufactured to BS5750/ISO 9001 standards and are widely used by professional contractors for sealing imprinted concrete surfaces around the UK.

Smartseal imprinted concrete sealers are available in a MATT, SILK or GLOSS finish and are suitable for all forms of printed concrete surfaces. Application tools such as sealing booms as well as anti-slip additives, colour tints and mastics for expansion joints are also available.

In most cases imprinted concrete, regardless of the current condition can be transformed to something like the original condition when first laid. Technical advice and help is available prior to application, which sometimes may involve the use of sealer repair fluid to rectify problems such as surface whiteness or 'peeling' or 'flaking' of the original sealer. General advice is available for guidance regarding the ratios of colour tint or anti-slip additive that can be added to the clear sealer.

### KEY FEATURES:

**Hard Wearing**  
Slows down surface degradation

**Professional Application**  
Available from Registered Contractors

**Moss & Algae Resistant**  
Inhibits the growth and spread of moss and algae

**Stain Resistant**  
Easier to remove oil leaks and grease stains

**Saves Money**  
By reducing ongoing maintenance costs

**Colour Restoration**  
Restore original colouring by adding colour tints to sealer

*"We recently did my drive and my brother in-law's, both were badly worn, and the results really are as good as new. Thanks again for a great service and a great product."*
