

Technical Datasheet – Rust Remover

PRODUCT DESCRIPTION

Smartseal Rust Remover is effective for dissolving problematic rust stains caused by iron-containing fertilizers, metal garden furniture, leaking heating systems, etc on natural stone and concrete surfaces.

PURPOSE

The fast-acting formulation will start to work straight away after application as it starts to attack and neutralise any rust stains present. Within minutes the powerful chemical formula creates a purple coloured reaction where the rust stains were so you can see the rust remover working. The acid-free formulation is PH neutral and will not damage the natural stone or concrete after application.

SPECIAL PROPERTIES

- Advanced pH neutral formula (non-acidic)
- Suitable for use on internal and external natural stone and surfaces
- Fast acting without causing damage to the surface of the stone or concrete
- Solvent free impregnating sealer

APPLICATION INSTRUCTIONS

- Generously apply neat to a dry surface and work in with a brush. A purple discolouration shows the start of the reaction.
- Allow to work for about 5 min, 10 minutes maximum. Do not allow the product to dry.
- After working time, rinse off with plenty of water.
- Important: working time must not exceed 10 minutes.
- Repeat procedure if required. Some stone & concrete may change colour after treatment.

COVERAGE

Average coverage up to 10m² per litre, dependant on surface porosity and stain.

PACKAGING

Smartseal Rust Remover is available in 1L plastic container.

STORAGE

Store away from sun and sources of heat. Avoid frost and low temperatures.
Can be stored for 12 months (in original sealed container).

HEALTH AND SAFETY

Refer to the Safety Data Sheet for further information.
